Gestion de Reservas (Reservation Managements):

The screenshot shows a database management interface with a query editor at the top containing the SQL statement: `1 • SELECT * FROM project1.reservation_managements;`. Below the editor is a toolbar with options like 'Result Grid', 'Filter Rows', 'Edit', 'Export/Import', and 'Wrap Cell Content'. The main area displays a table with the following columns: `idreservation_managements`, `resourceName`, `startDate`, `startHour`, `finalDate`, `finalHour`, `reason`, `idusers`, and `idcalendar`. The first row of data shows a value of `*` in the `idreservation_managements` column and `NULL` for all other columns. On the right side, there is a vertical toolbar with icons for 'Result Grid', 'Form Editor', and 'Field Types'. At the bottom, there is a status bar with the text 'managements 1' and buttons for 'Apply' and 'Revert'.
